There are many ways to get articles into your Mendeley library. Try one of these popular methods:

- Import from your reference manager: Use the import function under the 'File' tab in Mendeley desktop.
- Use the web importer: Get the web importer from the 'Tools' bar in Mendeley desktop and import articles directly.
- Use the watch folder: Create a folder on your own computer and set up Mendeley to watch this folder using the settings under the 'File' tab. Each PDF saved to that folder will be automatically imported to your Mendeley library.
- Search Mendeley: Use either 'Papers' on the web version or 'Literature Search' in Mendeley desktop.

Once documents are in your Mendeley library, you can organise them using an iTunes-style folder management approach.

- Create folders to keep various research interests separate from one another.
- Add tags to make it easy to find articles.
- Use the 'Sync' button so that changes you make in your desktop version of Mendeley are automatically carried over to your web and iOS versions (and vice versa).
- 'Mendeley suggest' presents you with interesting articles in your field based on the contents of your library.
- Use 'Account usage' in your Mendeley web version to keep track of how much of your free 2GB storage space you have available.

### **3.** Highlight, annotate and share articles with your research team members.

Create private groups on Mendeley desktop or web versions, or join public groups. Basic Mendeley allows you to create private groups with up to 3 members per group.

- Use drag-and-drop to add articles to your groups.
- Annotate and highlight articles in your library and share them with your private group(s). Then, group members will be able to see your edits and add their own annotations and highlights.
- Join public 'Groups' in the web version of Mendeley.
- **Team plans** are also available. A Team Plan allows you to create an unlimited number of private groups with up to 50 people, and get unlimited group library space.
